Pre-Med / Pre-Professional Health Student Project

This Cru summer project is for undergrad students pursuing a career in the health professions. Pre-med, pre-dental, pre-nursing, and pre-allied health students are welcome to apply.

Please note that if you are officially accepted into medical school, nursing school, OT school, PA school, etc. you would be eligible to apply to the Health Student Project / Whole Person Care Preceptorship, held June 14-July 16, 2014. Visit GoMets.org for more info.

Many Christian health students long to integrate their faith into their professional practice. National studies indicate 60%-70% of patients want their health provider to address their spiritual needs. Yet most professionals do not know how to do this and health students are not taught. Spend 10 days this summer learning to meet both the physical and spiritual needs of your future patients.

Experienced Christian medical, nursing and allied health students and Christian physicians and nurses will train you to care for the whole person - body, mind, and soul - in an ethical, caring, and sensitive manner. You'll apply what you've learned by offering the life-changing hope of Jesus Christ to real patients and their family members in healthcare facilities.

You'll gain valuable training and experience that will help clarify God's calling on your life and provide a unique experience that may enhance your application to medical or nursing school or various allied health school programs.

Cost includes all meals, lodging, local transportation, vision trip to Arizona, and materials.

Please note that participants are required to complete immunizations including varicella, Hepatitis B, tdap, and MMR. TB clearance and a background check are also required.
